

20 Years of Bio-Match® science, now in prescription care

Good Clean
Clinical Care

Good Clean Clinical Care is the next evolution in vaginal health – where prescription compounding meets microbiome science. Gain actionable insight into the vaginal health of your patients and become a prescriber of our custom-compounded formulations designed for complex conditions.

Prescriber portal launching in Summer 2026.

THE BIO-MATCH® FOUNDATION WITH ACTIONABLE INSIGHTS

BiomeNourish™: The first prescription base engineered for the vaginal microbiome

For over 20 years, Good Clean Love's patented Bio-Match® technology has been trusted by 18,000+ women's health practitioners. Now, founder Wendy Strgar has brought that same microbiome-first science to prescription medicine.

BiomeNourish™ is our prescription compounding platform – engineered to work with vaginal physiology, not against it:

- **Physiologic pH (3.8-4.5):** Maintains the environment protective Lactobacillus requires
- **Iso-osmolar (≤ 1200 mOsm/kg):** Prevents epithelial stress and irritation
- **Microbiome-preserving:** Avoids disruptive preservatives and antimicrobials
- **Barrier-supportive:** Includes ceramides and lipids that support tissue integrity

Unlike hyperosmolar generic bases, BiomeNourish™ improves patient tolerability on sensitive tissue – reducing treatment discontinuation and improving outcomes.

Available as both cream and suppository.

56-target qPCR panel: Move beyond trial-and-error

Our proprietary vaginal health panel uses the same qPCR technology physicians rely on for routine diagnosis – not experimental analysis.

What we measure:

- Protective Lactobacillus species (4 key strains)
- BV-associated bacteria (15+ organisms)
- Pathogenic bacteria including uropathogens
- Fungal pathogens (Candida species)
- STIs (Trichomonas, Mycoplasma genitalium, Ureaplasma)

Why it matters: Quantitative counts – not just positive/negative – allow you to differentiate eubiosis from dysbiosis, identify subclinical infections, guide species-specific treatment, and monitor microbiome recovery.

PRESCRIBE FROM OUR FORMULARY OR REQUEST CUSTOM FORMULATIONS

Access custom-compounded therapies rarely available through standard pharmacies, all delivered in BiomeNourish™:

Therapeutic Categories:

- **Antimicrobials:** Targeted treatment for bacterial and fungal infections
- **Hormonal support:** Ultra-low-dose estradiol, estriol, and DHEA for tissue health
- **Neuropathic pain modulators:** Gabapentin, naltrexone for vulvodynia and nerve pain
- **Anti-inflammatory agents:** Tacrolimus, mast cell stabilizers for immune dysregulation
- **Barrier and moisture support:** Hyaluronic acid, ceramides, vitamin E for tissue repair
- **Anesthetic agents:** Lidocaine, pramoxine for immediate symptom relief

Become a prescriber of our evidence-based protocols tailored to your individual patient needs.

CONDITIONS WE ADDRESS

Comprehensive care for complex vulvovaginal conditions

- Recurring bacterial vaginosis
- Chronic vulvovaginal candidiasis
- Chronic UTIs with vaginal uropathogen enrichment
- Vulvodynia and vestibulodynia
- Cancer survivor symptoms
- Genitourinary syndrome of menopause
- Lichen sclerosus and inflammatory dermatoses
- Pain-predominant conditions requiring multimodal care

INSIDE THE PRESCRIBER PORTAL

Vaginal Microbiome Testing

- Order 56-target panels directly for patients
- Real-time results with clinical interpretation
- Longitudinal tracking for treatment monitoring

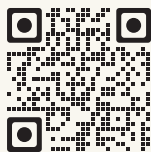

Prescription Ordering

- Browse formulary by condition or therapeutic category
- Access pre-built protocols or request custom formulations
- Direct-to-patient shipping

Clinical Support

- Evidence-based treatment algorithms
- CME-eligible educational modules
- Consultation access with GCCC clinical team
