pH: 3.6-4.1
Osmolality: 250-400 mOsmol/kg

Bio-Match®

Bio-Match® is a three-tier technology which mimics the body's natural vaginal fluids to support healthy vaginal tissue and maintain the stability of the vaginal microbiome.

Iso-osmotic

Contains same solute level as vaginal fluids which prevents drying out vaginal tissue and compromising the epithelial barrier

pH-balances

Reduces and maintains healthy vaginal pH which suppresses pathogenic bacteria and supports vaginal microbiome health

Proprietary Lactic Acid

Contains both D & L Isomers for a diverse range of lactobacilli that supports healthy vaginal flora and suppresses pathogens
